WORK EXPERIENCE

Freelance Graphic Designer and Web Developer

2016 - Present

Delivering custom modern websites and digital design solutions for small businesses in the Pacific Northwest.

• 2020 - Star Bar Portland Website

Responsive website design and development of Portland's Star Bar using modern web development tools. Attention to detail and communication with the ownership was a constant throughout the project's development.

• 2020 - Black Water Bar Portland Website

Custom design and implementation of the bars website using Perch CMS, Bootstrap, and Netlify as a deployment solution. During the project a close relationship with the client was maintained to deliver a product that increased online food sales and carried out their brand and vision.

• 2019 - Cowboy Church Southwest Washington Website

Redesign and upgrade of website using Craft CMS and modern web development tools to deliver a responsive website that meets the needs of the community using the website.

• 2017 - Fidelity Unlimited Recording Studio Website & Branding

Complete re-brand and implementation of a responsive website for a Portland, Oregon analog recording studio. Website features included services and a comprehensive overview of studio features.

IT Technician & Media Services

2015 - Present

Portland Community College Cascade Campus & Downtown Center

Maintain and support computer and software campus wide. Setup audio and video equipment for college events. Program and troubleshoot Crestron podium computers and classroom projector systems. Produced documentation of workflows and tracked progress using KACE management system.

Sound Technician & Live Event Booker

2009 - 2015

Black Water Bar and Venue

Provided live sound mixes for live music, comedy and social events on a nightly basis and maintained live sound production equipment. Worked directly with bands and artists to book and manage live events.

EDUCATION

Portland Community College

- 2015-2017 Associates of Science

Specialization: Computer Science & Mathematics
